VOLUME 3 1986

SUBJECT INDEX

Abstinence, 223
  alcoholism treatment
  biological markers
  gamma glutamyl transferase (γGT)
  mean corpuscular volume (MCV)
Acetaldehyde
  acetate, 163
  alcohol pathogenesis, 239
  alcohol preference, 239
  aldehyde dehydrogenase (ADH) levels, 215
  antioxidant sensitive respiration, 163
  apnea, 317
  bradycardia, 317
  cardiorespiratory inhibitory reflex, 317
  cold exposure, 351
  diethylmaleate treatment effects, 163
  endogenous ethanol metabolism, 239
  ethanol, 163, 215, 351
  fasting effects, 163
  glutathione depletion, 163
  guinea pigs, 351
  human studies, male, 215
  hypotension, 317
  intravenous administration, 317
  perfused liver, 163
  serum catecholamines, 351
  urinary salsolinol, 215
  vagotomy, 317
Acetate, 163
  acetaldehyde
  antioxidant sensitive respiration
  diethylmaleate treatment effects
  ethanol
  fasting effects
  glutathione depletion
  perfused liver
^{13}C-Acetate, 227
  aldehyde dehydrogenase deficiency
  ^{13}C-ethanol
  human studies
Acetate activation, 63
  adenosine monophosphate
  ethanol metabolism
  mitochondrial AMP accumulation
Adenosine monophosphate, 63
  acetate activation
  ethanol metabolism
  mitochondrial AMP accumulation
Affective disorders, 97
  alcoholism
  lithium orotate
  related conditions
Age differences
  alcohol, 291
  alcoholism, 89
  central cholinergic neurotransmission, 291
  grief awareness, 89
  human studies, 89
  inbred strains, 291
  length of illness, 89
  long-term intoxication, 291
  loss identification, 89
  sex differences, 89
  strain differences, 291
Aging, 345
  alcohol
  chronic alcohol intoxication
  dopamine
  inbred strains
  serotonin
  strain differences
  tolerance
Alcohol
  age differences, 291
  aging, 345
  alcohol dependence, 361
  alcohol preference, 361
  alcohol withdrawal, 371
  ambient temperature, preferred, 339
  blood alcohol concentration, 185, 269
  brain development, 269
  catecholamines, 371
  central cholinergic neurotransmission, 291
  chronic alcohol intoxication, 345
  colonic temperature, 339
  conditioned aversion, 27
  consumption patterns, 193
  dopamine, 345
  dose-differences, 77
  drinking, 77, 383
  evaporative water loss, 339
  fetal alcohol syndrome (FAS), 269
  gustatory neocortex, 27
  human studies, alcoholics, 371
  human studies, females, 193
  inbred strains, 291, 345
  individual differences, 371
  long-term intoxication, 291
  marihuana, 193
  metabolic rate, 339
  microencephaly, 185, 269
  monkeys, 383
  naltrexone, 383
  nose poking, 201
  olfactory bulbs, 27
  preferred alcohol concentration, 383
  prenatal exposure, 201
  salsolinol, 371
  schedule-induced polydipsia, 361
  serotonin, 345
  sex differences, 185
  sexual activity, 193
  sleep-wake patterns, 77
  strain differences, 77, 291, 345
  temporal concordance, 193
  thermoregulation, autonomic, 339
  thermoregulation, behavioral, 339
  third trimester equivalent, 185
  tolerance, 345
  urinary secretion, 371
  voluntary alcohol intake, 383
Alcohol abuse detection, 287
  alcoholism diagnosing
  human studies
  trauma questionnaire
Alcohol consumption, 73
  blood ethanol
  circadian rhythms
  genetic breeding
Alcohol dehydrogenase
  aldehyde dehydrogenase, 107, 131
  1,4 butanediol, 367
  carbamazepine, 131
  degradation, 367
  ethanol, 131, 367
  γ-hydroxybutyric acid, 367
  in vitro, 367
  lactate dehydrogenase, 107, 131
  lithium, 107
  maternal exposure, 107
  neonates, 107
  sex differences, 131
Alcohol dependence
  alcohol, 361
  alcohol preference, 361
  schedule-induced polydipsia, 33, 361
  water-electrolyte status, 33
Alcohol, maternally fed, 169
  ethanol vapor
  lactation
  postnatal development
Alcohol pathogenesis, 239
  acetaldehyde
  alcohol preference
  endogenous ethanol metabolism
Alcohol preference
  acetaldehyde, 239
  alcohol, 361
  alcohol dependence, 361
  alcohol pathogenesis, 239
  endogenous ethanol metabolism, 239
  lactation, 19
  pre-pregnancy alcohol, 19
  schedule-induced polydipsia, 361
Alcohol withdrawal
  alcohol, 371
  carbamazepine, 113
  catecholamines, 371
  human studies, alcoholics, 371
  individual differences, 371

  biological markers, 11
  diagnosis, 83
  drinking practice, 175
  epidemiology, 83
  glyoxalase I, 11
  grief awareness, 89
  grieving process, 95
  hopelessness, 93

human studies, 11, 89, 93, 95
human studies, male, 175
length of illness, 89
lithium orotate, 97
loss identification, 89, 95
meaningful present, 93
neuropsychological performance, 175
phenotypes, 11
related conditions, 97
sex differences, 89
social drinkers, 175
Alcoholism diagnosing, 287
alcohol abuse detection
human studies
trauma questionnaire
Alcoholism treatment, 223
abstinence
biological markers
gamma glutamal transferase (γGT)
mean corpuscular volume (MCV)
Aldehyde dehydrogenase
acetaldehyde levels, 215
alcohol dehydrogenase, 107, 131
carbamazepine, 131
ethanol, 131, 215
human studies, male, 215
lactate dehydrogenase, 107, 131
lithium, 107
maternal exposure, 107
neonates, 107
sex differences, 131
urinary salsolinol, 215
Aldehyde dehydrogenase deficiency, 227
^{13}C-acetate
^{13}C-ethanol
human studies
Ambient temperature, preferred, 339
alcohol
colonic temperature
evaporated water loss
metabolic rate
thermoregulation, autonomic
thermoregulation, behavioral
Aminotriazole pretreatment, 181
ethanol blood levels
intraperitoneal administration
Angiotensin converting enzyme (ACE), 357
human studies, alcoholics
serum levels
Antioxidant sensitive respiration, 163
acetaldehyde
acetate
diethylmaleate treatment effects
ethanol
fasting effects
glutathione depletion
perfused liver
Apnea, 317
acetaldehyde
bradycardia
cardiorespiratory inhibitory reflex
hypotension
intravenous administration
vagotomy
Apparatus
lickometers, 73
microcomputers, 73

Baboons, 205
liver ALDH, baboons
subcellular fractionation
Bilirubin glucuronidation, 139
ethanol
liver
maternal intake
Biological aspects, 83
alcoholism
diagnosis
epidemiology
Biological markers
abstinence, 223
alcoholism, 11
alcoholism treatment, 223
gamma glutamyl transferase (γGT), 223
glyoxalase I, 11
human studies, 11
mean corpuscular volume (MCV), 223
phenotypes, 11
Blood alcohol concentration
alcohol, 185, 269
alcohol consumption, 73
brain development, 269
circadian rhythms, 73
fetal alcohol syndrome (FAS), 269
genetic breeding, 73
microencephaly, 185, 269
sex differences, 185
third trimester equivalent, 185
Blood gas concentration, 5
ethanol
body temperature
respiration
Blood serum, 135
carbamazepine
electrochemical detection
high pressure liquid chromatography (HPLC)
tricyclic antidepressants
Body temperature, 5
blood gas concentration
ethanol
respiration
Bradycardia, 317
acetaldehyde
cardiorespiratory inhibitory reflex
hypotension
intravenous administration
vagotomy
Brain
cerebellum, 233
cortex, 233
hippocampus, 233, 291, 345
hypothalamus, 249, 351
lateral cerebral ventricle, 273
nucleus of the tractus solitarus, 55
striatum, 233, 291, 345
Brain development, 269
alcohol
blood alcohol concentration (BAC)
fetal alcohol syndrome (FAS)
microencephaly
1,4-Butanediol, 367
alcohol dehydrogenase
degradation
ethanol
γ-hydroxybutyric acid
in vitro

Calcium antagonism, 273
Ca^{++}-channel blockade
ethanol
poikilothermia
thermoregulation
Calcium-calmodulin phosphorylation, 233
ethanol
protein kinase
Ca^{++}-channel blockade, 273
calcium antagonism
ethanol
poikilothermia
thermoregulation
Carbamazepine
alcohol dehydrogenase, 131
alcohol withdrawal, 113
aldehyde dehydrogenase, 131
blood serum, 135
electrochemical detection, 135
ethanol, 131
high pressure liquid chromatography (HPLC), 135
lactate dehydrogenase, 131
pharmacological intervention, 113
sex differences, 131
side effects, 113
tricyclic antidepressants, 135
Carbon monoxide, 157
coronary flow
hypoxia
isolated heart
nicotine
Cardiorespiratory inhibitory reflex, 317
acetaldehyde
apnea
bradycardia
hypotension
intravenous administration
vagotomy
Catecholamines, 371
alcohol
alcohol withdrawal
human studies, alcoholics
individual differences
salsolinol
urinary secretion
Cell development, 261
ethanol
organ growth
perinatal exposure
Central cholinergic neurotransmission, 291
age differences
alcohol
inbred strains
long-term intoxication
strain differences
Cerebral metabolism, 23
dose effects
ethanol
time effects
Chlordiazepoxide, 309
cross-dependence
ethanol dependence
Chronic alcohol intoxication, 345
aging
alcohol
dopamine
inbred strains
serotonin
strain differences
tolerance
Circadian rhythms, 73
alcohol consumption
blood ethanol
genetic breeding
Cold exposure, 351
acetaldehyde

ethanol
guinea pigs
serum catecholamines
Colonic temperature, 339
alcohol
ambient temperature, preferred
evaporative water loss
metabolic rate
thermoregulation, autonomic
thermoregulation, behavioral
Conditioned aversion, 27
alcohol
gustatory neocortex
olfactory bulbs
Consumption patterns, 193
alcohol
human studies, females
marihuana
sexual activity
temporal concordance
Coronary flow, 157
carbon monoxide
hypoxia
isolated heart
nicotine
Corticosterone response, 255
ethanol
morphine
neonates
ontogeny
pituitary-adrenal system
prenatal exposure
Cross-dependence, 309
chlordiazepoxide
ethanol-dependence

Degradation, 367
alcohol dehydrogenase
1,4 butanediol
ethanol
γ-hydroxybutyric acid
in vitro
Developing fetus, 101
ethanol
lithium
teratogenic effects
Diagnosis, 83
alcoholism
biological aspects
epidemiology
Dietary interrelationships, 145
ethanol
pregnancy
zinc
Diethylmaleate treatment effects, 163
acetaldehyde
acetate
antioxidant sensitive respiration
ethanol
fasting effects
glutathione depletion
perfused liver
Divalent cation, 69
ethanol
sleeping time
Dopamine, 345
aging
alcohol
chronic alcohol intoxication
inbred strains
serotonin
strain differences
tolerance
Dose-differences, 77
alcohol
drinking
sleep-wake patterns
strain differences
Dose effects, 23
cerebral metabolism
ethanol
time effects
Drinking
alcohol, 15, 77, 131, 303, 383
